

**Job Title: Full Stack Developer****Experience:** 3–8 years**Location:** New Delhi – On Site**Department:** Technology / Product Development**Reporting To:** Product Manager / Tech Lead

---

**About NICDC Logistics Data Services Limited**

We are a leading logistics and supply chain data services provider, leveraging technology to streamline and optimize operations across the logistics ecosystem. Our mission is to build scalable, data-driven platforms that enhance visibility, efficiency, and user experience in the logistics domain.

---

**Job Overview**

We are looking for a skilled and versatile **Full Stack Developer** to join our product engineering team. The ideal candidate will have strong expertise in both frontend and backend development, with hands-on experience in building scalable web and mobile applications. You will work closely with product managers, designers, and other developers to deliver robust, high-performance solutions that meet business and user needs.

---

**Key Responsibilities**

- **Full Stack Development:** Design, develop, and maintain end-to-end web and mobile applications using modern frontend and backend technologies.
- **Feature Implementation:** Collaborate with product and design teams to translate UI/UX designs into functional, responsive, and interactive user interfaces.
- **Backend Development:** Build scalable RESTful APIs, microservices, and server-side logic using Node.js, NestJS, or similar frameworks.
- **Database Management:** Design and optimize database schemas, write efficient queries, and manage data storage using MongoDB, PostgreSQL, or similar databases.
- **Mobile Development (Optional):** Develop cross-platform mobile applications using Flutter or native technologies (iOS/Android).
- **Performance & Scalability:** Optimize applications for maximum speed, scalability, and security.
- **Code Quality & Testing:** Write clean, maintainable code and implement unit, integration, and end-to-end testing.
- **Collaboration & DevOps:** Work closely with DevOps teams to ensure smooth CI/CD pipelines, deployments, and cloud infrastructure management (AWS/Azure).

- **Technical Documentation:** Create and maintain technical documentation for APIs, systems, and processes.

## Required Skills & Qualifications

- **Experience:** 3–8 years in full stack development, preferably in enterprise, SaaS, logistics, or supply chain domains.
- **Frontend:** Proficiency in **Vue.js**, **Next.js**, **React**, **Flutter**, or similar frameworks/libraries.
- **Backend:** Strong experience with **Node.js**, **NextJS**, **Express.js**, or similar backend frameworks.
- **Database:** Hands-on experience with **MongoDB**, **Firebase**, or relational databases.
- **Cloud & DevOps:** Familiarity with **AWS** (Certified Cloud Practitioner preferred) or **Azure** (AZ-900/DP-900 certified is a plus).
- **Mobile Development:** Experience with **Flutter** or native mobile development (iOS/Android) is desirable.
- **Version Control:** Proficient in Git and collaborative development workflows.
- **Soft Skills:** Strong problem-solving, communication, and teamwork skills. Ability to thrive in an Agile/Scrum environment.

## Preferred Qualifications

- Experience with **real-time data applications**, **dashboard development**, or **logistics/supply chain platforms**.
- Knowledge of **containerization** (Docker, Kubernetes) and **CI/CD tools** (Jenkins, GitHub Actions).
- Familiarity with **microservices architecture** and **serverless computing**.
- Background in **computer science** or **engineering** is advantageous.
- Certifications in **AWS**, **Azure**, or **full stack development** are a plus.
