

# **NICDC LOGISTICS DATA SERVICES LIMITED**

## **Job Description – Data Analyst**

**Job Title:** Data Analyst

**Location:** Delhi NCR, India

**Department:** Information Technology

### **Company Detail:**

- NICDC Logistics Data Services Limited (NLDSL) was incorporated on 30th December 2015, as a joint venture between the Government of India represented by the National Industrial Corridor Development and Implementation Trust (NICDIT) and Japanese IT major NEC Corporation, with 50:50 equity participation.
- The objective is to effectively leverage ICT across the Indian Logistics Sector, inculcate best practices across various processes, and work towards bringing efficiency in the supply chain.
- The company aims to bring visibility and transparency in the logistics environment, streamline operations, and contribute to the government's plan of improving the Ease of Doing Business in India.

### **Position Overview:**

- We are seeking a results-driven Data Analyst to transform complex, multi-source datasets into actionable business intelligence.
- The ideal candidate will have expertise in designing and delivering custom Power BI, Tableau, and Looker dashboards.
- This role requires an individual adept at translating technical findings into strategic recommendations for both technical and non-technical stakeholders.

### **Key Responsibilities:**

- Architect and deploy custom Power BI, Tableau, and Looker dashboards to enable real-time visibility into KPIs.
- Conduct end-to-end data validation across datasets, identifying and rectifying critical inconsistencies to reduce reporting errors.
- Spearhead high-priority cross-functional reporting initiatives by integrating client and internal data to produce strategic analytical reports for senior leadership.
- Collaborate with product and engineering teams to define data requirements, validate outputs, and ensure dashboard accuracy.
- Establish flexible, scalable reporting functionalities to expand self-service analytics capabilities for end-users.
- Deliver trend and demographic analyses to provide actionable insights that inform strategic planning and improve business performance.

### **Education and Certifications:**

- **Mandatory:** Bachelor's degree in Engineering or a relevant discipline.
- **Desirable:** Certifications in Data Analytics, Power BI, or Python.

### **Technical Skills, Knowledge & Abilities:**

- Proficiency in BI tools including Power BI, Tableau, Looker, Google Analytics, and DAX.
- Strong knowledge of Advanced SQL, Data Mining, ETL Processes, and Data Quality Control.
- Expertise in Advanced MS Excel and Microsoft Office Suite.
- Strong communication, teamwork, problem-solving, and adaptability skills.

### **Work Experience:**

- 2+ years of relevant experience in data analytics or business intelligence.
- Experience in client relationship management and cross-functional reporting will be preferred.

### **Compensation:**

- As per company norms.
- Perks - Term Insurance, Medical Insurance, Accident Insurance, etc.
