

NICDC LOGISTICS DATA SERVICES LIMITED

Job Description – Cloud Engineer

Job Title: Cloud Engineer

Location: Delhi NCR, India

Department: Information Technology

Type: Full-time

Company Detail:

- NICDC Logistics Data Services Limited (NLDSL) was incorporated on 30th December 2015, as a joint venture between the Government of India represented by the National Industrial Corridor Development and Implementation Trust (NICDIT) and Japanese IT major NEC Corporation, with 50:50 equity participation.
- The objective is to effectively leverage ICT across the Indian Logistics Sector, inculcate best practices across various processes, and work towards bringing efficiency in the supply chain.
- The company aims to bring visibility and transparency in the logistics environment, streamline operations, and contribute to the government's plan of improving the Ease of Doing Business in India.

Position Overview:

NLDSL is looking for a Cloud Engineer to manage the backend infrastructure powering our in-house platforms — Logistics e-Marketplace, ULIP app, LDB dashboard, Koyla Shakti dashboard, and others — across cloud and on-premise environments.

Key Responsibilities:

- Manage backend infrastructure for all in-house platforms, ensuring uptime and reliability.
- Configure and monitor infrastructure on NIC servers; manage cloud environments as needed.
- Handle database administration and backend code deployment, troubleshooting, and optimization.
- Administer on-premise servers and NAS storage — setup, backups, and recovery.
- Apply security best practices, access controls, and patching across all environments.
- Monitor performance, respond to incidents, and support deployments.

Required Skills:

- Hands-on experience with **NIC (National Informatics Centre) servers** (mandatory).
- Solid knowledge of database management and backend code handling.
- Experience with on-premise server and **NAS management**.
- Understanding of networking, security, backups, and disaster recovery.
- Familiarity with scripting/automation (Bash, Python, or PowerShell).

Good to Have:

- Experience with **Azure and/or AWS** (optional).
- Exposure to CI/CD, containerization, or infrastructure-as-code.
- Experience supporting government or logistics-sector platforms.

Compensation:

- As per company norms.
- Perks - Term Insurance, Medical Insurance, Accident Insurance, etc.
