Allcargo Group announces Board restructuring

Exim News Service

MUMBAI, Aug. 6

ALLCARGO Group has recently completed its multi-year restructuring journey with the listing of Allcargo Global last month. The Group now comprises four independent listed companies, each with an independent Board, management team, and distinct Chairperson and Managing Director. As the Group's Founder and Chairman, Mr Shashi Kiran Shetty has guided the Group through this transformation and will continue to drive governance and growth across its businesses with his wisdom,

experience and strategic insights.

Model Concession Agreement simplified

Container Train Operators can now run trains on all routes under single All-India license

Exim News Service

NEW DELHI, Aug. 6

INDIAN Railways has approved modifications in the Model Concession Agreement (MCA) governing permission for operators to run container trains on its network.

Under the approved changes, Container Train Operators (CTOs) will be permitted to run container trains on all routes across the network under a single All India license, with a uniform registration fee

Navi Mumbai International Airport commences first international dedicated freighter operation

Exim News Service

NAVI MUMBAI, Aug. 6

NAVI Mumbai International Airport (NMIA) has marked a significant milestone in its cargo journey with the commencement of its first international dedicated freighter operation this week.

Operated by IndiGo CarGo, the inaugural NMI-Sharjah freighter carried approximately 20 tonnes of cargo, including general and perishable goods, along with bonded transfer cargo received from Mumbai and Ahmedabad.

This milestone reinforces NMIA's growing role as a new cargo gateway for the Mumbai Metropolitan Region and Western India, while strengthening its integrated cargo ecosystem for domestic, international, express and transit cargo movements, highlighted a communique.

Port security environment changing rapidly, is a shared national responsibility: Sonowal

Exim News Service

NEW DELHI, Aug. 6

MR Sarbananda Sonowal, Union Minister of Ports, Shipping and Waterways, said on Thursday that the port security environment is changing rapidly, with cyber threats, drones, supply chain disruptions, and risks to digital networks, information systems and critical infrastructure adding an entirely new dimension to maritime security.

Addressing the National Port Security Conference 2026 in New Delhi, he stressed that security of ports is a shared national responsibility. He said that In-

dia needs security systems that can anticipate risk, adapt quickly and respond in a coordinated manner. Mr Sonowal noted that India has always been a maritime nation for centuries and, under the leadership of Prime Minister Narendra Modi, is once again emerging as a major global maritime power. Indian ports are expanding, cargo volumes are growing, logistics networks are becoming more integrated, and new maritime infrastructure is being created under Sagarmala, PM Gati Shakti, Maritime India Vision 2030 and Maritime Amrit Kaal Vision 2047.

The Minister further said that the government is moving towards the

principle of security by design. Security should not be added after a port terminal or digital system has been developed, it must be built into the planning, design, technology and operation of maritime infrastructure from the very beginning. Highlighting the importance of the proposed Bureau of Port Security (BoPS), he said it aims to strengthen institutional capacity, improve regulatory oversight, and enhance coordination among all stakeholders responsible for port security. It can help ensure better preparedness and more effective implementation of security standards across the country's ports, he added, as per a report.

Govt initiates pan-India audit of compliance facilities to help exporters meet global standards

Exim News Service

NEW DELHI, Aug. 6

THE Union Department of Commerce has initiated a nationwide mapping exercise to identify structural gaps in India's testing, inspection and certification infrastructure across key export sectors. The initiative aims to streamline compliance processes and reduce non-tariff barriers faced by Indian exporters in stringent international markets such as the European Union, the United States and East Asia. By auditing existing laboratory capacity, accreditation frameworks and quality assessment bodies, the government seeks to establish state-of-the-art testing facilities closer to major manufacturing and export hubs. Upgrading domestic compliance capabilities will help exporters meet evolving global standards—including sanitary and phytosanitary (SPS) norms, technical barriers to trade (TBT) and sustainability benchmarks—thereby reducing shipment rejections, lowering transaction costs and improving the global competitiveness of Indian products, according to a report.

India, Russia target \$100 billion bilateral trade by 2030: Envoy

Exim News Service

MOSCOW, Aug. 6

INDIA and Russia remain firmly on track to achieve \$100 billion in bilateral trade by 2030, propelled by sustained hydrocarbon cooperation, trade diversification and enhanced logistics corridors, according to Indian Ambassador to Russia Mr Vinay Kumar. Addressing bilateral commerce relations, the envoy highlighted that robust energy imports—comprising crude oil and petroleum products—continue to serve as a bedrock for trade volumes, while active efforts are

underway to address trade imbalances by boosting Indian exports in pharmaceuticals, agriculture, machinery and industrial components. Both the countries are focusing on establishing seamless national currency settlement mechanisms, expanding maritime freight capabilities and operationalising strategic transit routes such as the International North-South Transport Corridor (INSTC) and the Eastern Maritime Corridor (Chennai-Vladivostok) to accelerate cargo flows and deepen long-term economic integration, said a report.

RBI marginally ups FY27 real GDP growth projection to 6.7 pc

Exim News Service

MUMBAI, Aug. 6

THE Reserve Bank of India's (RBI) Monetary Policy Committee (MPC) unanimously decided to maintain the benchmark repo rate at 5.25% with a neutral policy stance during its August bi-monthly policy review. Driven by resilient domestic activity, the central bank marginally upgraded its real GDP growth forecast for FY27 to 6.7% (up from 6.6% projected in June), while trimming its full-year Consumer Price Index (CPI) inflation projection by 10 basis points to 5.0% (down from 5.1%). Quarterly GDP projections stand at

7.0% for Q1, 6.4% for Q2, 6.5% for Q3 and 6.8% for Q4. Concurrently, quarterly inflation trajectories are estimated at 4.1% in Q1, 4.7% in Q2, peaking at 5.9% in Q3 due to localised

food and fuel price pressures, before moderating to 5.5% in Q4. Announcing the policy resolution, the RBI Governor cautioned that the economic outlook remains hazy due to

persistent uncertainties surrounding the South-west monsoon, El Niño conditions, geopolitical volatility in West Asia and global trade policy developments, as per a report.

Escalating Black Sea conflict halts commercial shipping to Ukraine, slows Russian exports

Exim News Service

WARSAW, Aug. 6

A SHARP escalation in military strikes on commercial shipping, export terminals and port facilities across the Black Sea has severely disrupted global trade flows for agricultural commodities and energy, turning the basin into a volatile maritime chokepoint. In July alone, Ukraine reported 35 attacks on vessels in port, 22 strikes at sea and 67 attacks on port infrastructure—predominantly targeting the primary agricultural export hubs of Odessa, Chornomorsk and Pivdennyi. Concurrently, drone strikes against tankers linked to Russian oil trade and key export hubs at Taman and Novorossiysk have forced temporary vessel movement restrictions and loading delays. The operational paralysis threatens up to 35 million tonnes of grain exports, raising acute supply disruption concerns for food-importing nations across North Africa and the Middle East, while pushing daily Black Sea crude tanker rates past \$300,000 as global commodity markets face compounding pressures from Middle Eastern maritime routes, according to a report.

APPOINTMENTS

A well-established, rapidly growing freight forwarding company, registered with MTO and boasting a robust agency network worldwide, urgently requires the following personnel for its offices in **Mumbai (Andheri East)**.

Allcargo Logistics reports record revenue and margin expansion in Q1FY27

PBT grows over 258% and EBITDA over 39% as both express distribution and contract logistics business records highest revenue

Exim News Service

MUMBAI, Aug. 6

ALLCARGO Logistics Limited, an integrated logistics provider through its Domestic Supply Chain, Express Distribution and Consultative Logistics businesses, announced its consolidated financial results for the quarter ended June 30, 2026.

In the quarter, Allcargo Logistics delivered strong revenues across both express distribution and contract logistics business, backed by healthy volume growth, pricing discipline, customer-centric execution and sustained operational efficiencies. The company continued to strengthen its domestic logistics business through deeper customer engagement, higher adoption of digital capabilities, and focused cost optimisation initiatives, highlighted a communique.

Commenting on the results, **Mr Ketan Kulkarni, Managing Director and Chief Executive Officer, Allcargo Logistics Limited**, said: "Our Q1FY27 performance reflects the strength of disciplined execution across our businesses. Beyond achieving our highest-ever quarterly revenue in both express distribution and contract logistics, what is particularly encouraging is that this growth has been driven by a healthy combination of higher shipment volumes, stronger customer relationships and sustained operational improvements.

"Over the past few quarters, we have invested significant effort in building a customer service quality through a more personalised account management approach. Our service equation-led pricing approach improved yields during the quarter, while over 99% service quality adherence has resulted in a strong customer retention rate. We have also expanded our footprint across diverse industry sectors. At the same time, we are progressively leveraging AI-driven analytics and data-led decision-making to enhance demand forecasting, optimise network planning, improve shipment visibility and enable faster, more informed operational decisions across our logistics network. Continuous network optimisation, improved routing efficiencies, disciplined cost management and better asset utilisation have strengthened our operating leverage and profitability.

Going forward, we will continue to accelerate the use of AI, digital technologies and data intelligence across our operations and build a more agile and resilient supply chain. We remain focused on delivering consistent service quality, expanding customer partnerships and driving profitable growth through disciplined execution while driving long-term value creation."

Financial Performance

★ The company recorded EBITDA growth of 39% (Rs 20 crore) year-on-

year for Q1FY27, with Profit Before Tax (before Exceptional items) rising by 258% (Rs 31 crore), highest-ever quarterly revenue recorded across both express distribution and contract logistics businesses, supported by pricing stability and healthy volume growth

★ **Express Distribution:** Registered increased Revenue growth of 13.5% year-on-year for Q1FY27, driven by improvement in operational performance and enhanced service quality

★ **Contract Logistics (CL):** Registered increased Revenue growth of 6% year-on-year for Q1FY27, supported by efficiency led revenue growth with 99% service quality adherence resulting in a strong customer retention rate, expansion in footprint across diverse industry sectors and new business opportunities

★ **Outlook:** Building on the momentum achieved during the first quarter, Allcargo Logistics expects business activity to strengthen further in the second and third quarters, especially during the upcoming festive season. The company remains focused on sustaining profitable growth through disciplined pricing, superior customer experience, operational excellence and deeper market penetration across both express distribution and contract logistics while continuing to maintain a prudent growth strategy.

SDHI wins order from Svitzer to build four TRAnverse 3200 tugs

Exim News Service

MUMBAI, Aug. 6

SWAN Defence and Heavy Industries Limited (SDHI), India's largest shipbuilding and heavy engineering company, has secured a contract from Denmark-based towage operator Svitzer A/S to construct four advanced TRAnverse 3200 tugs. Deliveries for the order are scheduled to commence in early 2028.

The contract follows an extensive competitive evaluation of leading global shipyards. The high-specification vessels will be constructed to Bureau Veritas class.

Co-developed by naval architects Robert Allan Ltd. and Svitzer, the patented TRAnverse 3200 design is engineered for complex harbour towage and escort operations. Featuring a unique hydrodynamic hull design and omni-directional propulsion, the vessels are capable of safely guiding large ships through severe weather and restricted port channels. Delivering an 80-tonne bollard pull, the TRAnverse design is up to 15% more fuel efficient than conventional tug designs, directly supporting global maritime decarbonisation goals, as per a release.

The Transverse 3200 tugs will be biofuel, IMO Tier III emissions standards, and FiFi1 firefighting class ready,

reflecting the vessels' capability for reduced environmental impact and enhanced fire-response readiness in port and terminal operations.

Copenhagen-headquartered Svitzer operates a fleet of over 500 vessels worldwide. This order is a part of Svitzer's long-term fleet renewal programme, aimed at deploying next-generation, high-efficiency vessels to optimise port and terminal operations globally.

The vessels will be built at SDHI's yard in Pipavav, Gujarat, adjacent to the port where Svitzer also has a harbour towage operation, the release added.

Framework agreed between Iran and Oman to reopen Hormuz pending US blockade relief

Exim News Service

MUSCAT, Aug. 6

IRAN and Oman have reached an understanding on the geographical parameters and coordinates for a proposed commercial shipping corridor through the Strait of Hormuz, according to Iranian Foreign Ministry spokesperson Esmaeil Baghaei. Under the emerging framework negotiated between Tehran and Muscat, inbound maritime traffic into the Persian Gulf will be routed through Iranian-managed channels, while outbound vessels will navigate via Omani-controlled waters. A joint statement outlining the primary principles of the arrangement is in the final stages of drafting; however, Iranian officials emphasised that the agreement itself does not automatically guarantee full maritime security, citing unresolved issues, including the ongoing US naval blockade of Iranian ports. The proposed opening of the vital energy chokepoint aims to restore commercial vessel transit following months of operational disruptions and escalated maritime security risks across the region, said a report.

Truck rentals hold steady as logistics sector eyes festive demand

Exim News Service

NEW DELHI, Aug. 6

TRUCK rentals across key trunk routes remained steady in July 2026, even as global market uncertainty weighed on goods and vehicle demand and uneven monsoon conditions affected freight movement. Poor rainfall impacted agricultural freight movement, while flooding in parts of Gujarat, Kerala and the Himalayan region caused localised disruptions to trucking activity. Against this backdrop, the industry is looking towards the festive season as a critical demand driver for the logistics sector, said an analysis by Shriram Mobility Bulletin.

It elaborated:

On a month-on-month basis, rental trends were largely stable across key trunk routes. Bengaluru-Mumbai-Bengaluru and Kolkata-Guwahati-Kolkata recorded increases of around 2.1% and 1.9%, respectively. Delhi-Hyderabad-Delhi and Mumbai-Kolkata-Mumbai each rose by around 1%, while Delhi-Chennai-Delhi and Delhi-Bengaluru-Delhi registered marginal increases of around 0.9% and 0.4%, respectively. Delhi-Mumbai-Delhi, Delhi-Kolkata-Delhi, Bengaluru-Kolka-

ta-Bengaluru and Guwahati-Mumbai-Guwahati remained unchanged, while Mumbai-Chennai-Mumbai saw a marginal decline of around 0.6%.

On a year-on-year basis, rentals remained higher across all the key routes tracked. Delhi-Kolkata-Delhi recorded growth of around 15%, followed by Bengaluru-Mumbai-Bengaluru at approximately 11% and Kolkata-Guwahati-Kolkata at about 9%. Delhi-Mumbai-Delhi and Mumbai-Chennai-Mumbai grew by around 8% and 7%, respectively.

Vehicle sales trends remained mixed in July. Agricultural tractor sales rose by around 14% month-on-month, while goods carrier sales increased by approximately 8% and earth-moving equipment sales were up by around 6%. Three-wheeler goods vehicles and construction equipment vehicles each rose by about 3%. Maxi cab sales increased by around 17%.

On a year-on-year basis, vehicle sales recorded growth across categories. Three-wheeler goods vehicles grew by around 47%, earth-moving equipment by approximately 35%, maxi cabs by around 34% and agricultural tractors by

APPOINTMENTS

**JAK MARITIME & LOGISTICS
INDIA PVT. LTD.**

*We are one of the leading International Freight Forwarding / NVOCC company
required the following personnel to join our Mumbai office*

SALES EXECUTIVE

2 Posts Freight Forwarding & 2 Posts NVOCC

Candidate should be Graduate or above, having at least 2-3 years experienced in Freight Forwarding / NVOCC Company. Candidate Should possess experience in handling day to day follow up with customers.

DOCUMENTATION & CUSTOMER SERVICE EXECUTIVE - 2 Posts

Candidate should be a Graduate with minimum 2+ years of experience on Freight Forwarding Documentation. Candidate should have basic knowledge about Pan India operations, must be fluent in English and having Computer skill.

Salary Negotiable

*Interested candidates may submit their detailed resume
with passport-size photograph within 7 days to following*

**E-mail : subhasis@jakmaritime.com
roy@jakmaritime.com
soumitra@jakmaritime.com
info@jakmaritime.com**

approximately 31%. Goods carrier sales were higher by around 29%, motorcycles/scooters by approximately 28% and motor cars by around 20%.

Electric vehicle sales continued to record strong growth in July. E-two-wheeler sales increased by around 7% month-on-month, while e-three-wheeler sales rose by approximately 16%. Electric motor car sales were marginally lower by around 1% month-on-month. On a year-on-year basis, electric motor car sales grew by around 148%, e-two-wheeler sales by approximately 114%, and e-three-wheeler sales by around 97%.

Commenting on the trends, **Mr Sudarshan Holla, Joint Managing Director & Chief Operating Officer, Commercial Vehicles, Shriram Finance**, said, "Freight rates across key trunk routes remained largely unchanged, indicating a stable operating environment for transporters. Looking ahead, the festive

season will be a critical demand driver for the logistics sector. Current expectations point to rentals holding at existing levels, although a section of the industry believes a stronger festive cargo cycle could lead to a modest increase in truck rentals".

Fuel consumption and FASTag data reflected mixed mobility trends in July. Petrol consumption increased by around 1% month-on-month, while diesel consumption declined by around 6%. On a year-on-year basis, petrol and diesel consumption were higher by around 8.6% and 9.4%, respectively. Higher year-on-year diesel consumption coincided with increased reliance on diesel pump sets amid water shortages in areas affected by poor monsoon rains.

FASTag collections declined by around 4% in volume and approximately 1% in value month-on-month. On a year-on-year basis, collection volumes were lower by around 6%, while collection value increased by approximately 7%.

Allcargo Group announces Board restructuring

From page 3

Allcargo Global, where Mr Shetty serves as the Chairman, he has now stepped down from the Board of Allcargo Logistics Limited, enabling the company to have a distinct Chairman in line with his vision and the Group's strategic direction of creating independently governed companies with separate Chairpersons and Managing Directors.

The Board has appointed Mr Dinesh Kumar Lal, an existing Director on the Board, as the Chairman of Allcargo Logistics Limited, which runs the Group's domestic business across Express and Consultative Logistics.

Mr Shetty will continue to serve as Chairman of Allcargo Global Limited, the Group's international supply chain company with LCL, FCL and Air Freight as its core service offerings, informed a communique.

Container Train Operators

From page 3

of Rs 25 crore, doing away with the earlier system of separate permissions and fees for different route categories. The changes will be notified through a Gazette Notification.

Single license for all routes

As part of the approved modifications, the existing route-wise categorisation of licences will be discontinued. Subject to approval by the Ministry of Railways, CTOs will be granted a **Single All-India Licence**, enabling them to operate container trains across all routes on the Indian Railways network.

Uniform registration fee

The earlier system of charging different registration fees for different route categories has been done away with. Every applicant will now deposit a non-refundable **uniform registration fee of ₹25 crore** to operate on all routes on the network.

No fee on extension

The approved amendments provide that the permission granted to a CTO may be extended for a further period of 20 years after expiry. This will be done by the Competent Authority to the same operator on application, subject to satisfactory performance. No extension fee will be charged for this extension or for any future extensions to the same operator.

Relief for existing operators

Operators already holding Category I licenses may continue under their existing category until their concession period

ends. On renewal or extension under the new license, no fee will be charged to them.

Operators in Category II, III and IV may also continue in their existing categories until their concession period ends. For renewal or extension under the new license, they will pay **₹15 crore**. This is the difference between the new fee of ₹25 crore and the ₹10 crore already paid. This amount is non-refundable.

These operators may also choose to migrate early to the new license before completing their 20-year concession period. They will pay the same amount of ₹15 crore for early migration.

Benefits for industry

The uniform registration fee and removal of extension fees are expected to reduce regulatory and compliance costs for operators while simplifying the approval process.

The simplified licensing is expected to encourage greater private participation and expansion of container train operations, leading to improved rail-based freight movement across the country.

Greater use of rail for container transportation is expected to reduce logistics costs for industry, particularly MSMEs, by providing a more efficient and cost-effective freight transport option.

Increased modal shift of container traffic from road to rail is also expected to ease congestion on highways, reduce fuel consumption and lower carbon emissions, contributing to more sustainable freight transportation.

Towards a uniform and simplified licensing regime

The approved amendments are aimed at establishing a simplified and uniform licensing framework for CTOs across the Indian Railways network. The reforms are expected to facilitate a streamlined approval mechanism while providing a common regulatory framework for container train operations under the Model Concession Agreement, as per a Ministry communique.

JNPA registers container and overall cargo surge in April-July

Exim News Service

NAVI MUMBAI, Aug. 6

JAWAHARLAL Nehru Port Authority (JNPA) is continuing its strong growth momentum in key operational parameters.

From April to July 2026, JNPA handled 29,94,859 TEUs of containers and 36.62 million tonnes of total cargo, recording a growth of 14.37% in container traffic and 11.95% in overall cargo compared to the same period last financial year.

A clear reflection of improved efficiency and steady progress across operations.

JNPA has been demonstrating remarkable operational resilience by maintaining key performance parameters despite the geopolitical disruptions. At a time when global supply chains continue to face uncertainty, JNPA has ensured seamless port operations through proactive planning, efficient resource utilisation and close coordination with stakeholders.

Dedicated Freight Corridors contribute 14% of Railways' Gross Tonne Kilometres

Exim News Service

NEW DELHI, Aug. 6

THE Dedicated Freight Corridor Corporation of India Limited (DFCCIL) has achieved a significant milestone by contributing 14% of Indian Railways' total Gross Tonne Kilometres (GTKMs) **while utilising just 4% of the overall railway network.**

This achievement reflects the growing impact of the Dedicated Freight Corridor in enhancing freight capacity, improving operational efficiency and transforming the logistics landscape of the nation.

With world class infrastructure, higher capacity and faster freight movement, DFCCIL continues to play a pivotal role in building a more efficient and future-ready freight ecosystem for India.

India's Logistics Sector is becoming an Information Economy

—By Major General Shamsher Singh Ahlawat, Advisor, NLDSL

THE future of logistics will no longer be defined solely by trucks, ports and warehouses. Increasingly, the industry's greatest asset is becoming information-accurate, connected and actionable data that enables faster, smarter and more efficient supply chains.

Introduction

Logistics has been predominantly considered as the actual transportation of goods over the last few decades. Investments were made mainly in transport infrastructure, storage capacity and the company's distribution network. Although those elements are still essential for economic growth, a big change is happening in the industry. Today, the importance of information in logistics is growing. As supply chains become more complicated and interrelated, the ability to access, process and share reliable information becomes crucial in efficiency improvement.

Information is the new competitive advantage

In the present scenario, logistics results in the generation of massive data such as status of the shipment, level of inventory, Customs clearance, multimodal transfers as well as the delivery date/time. But since it is not the quantity but the usability of the data that matters the most, data helps businesses when it aligns across the stakeholders, allowing them to see better what they are doing, plan accordingly, eliminate risks and react to disturbances in an effective manner. In fact, this marks a new era for the logistics industry, since information has become that strategic asset of the business instead of simply being a by-product of operations.

From data to decision intelligence

The digital platforms available in India are playing an important role in the transformation of logistics from a data-centric approach to one that is intelligence-driven. For instance, the **Unified Logistics Interface Platform (ULIP)** works through different government systems and private entities in the form of a data exchange avenue through which all reliable and useful logistic-related information would be accessible. The **Logistics Data Bank (LDB)** further gives information on the entire journey of containers, through air, road and waterways, thus helping companies in making decisions regarding logistics based on real-time information gathered from this platform. Likewise, the **Koyla Shakti Dashboard** shows the effectiveness of methods for enhancing logistics in specific sectors, such as coal-based logistics, by offering an overview of shipment movement that can be used for efficient planning and resource utilisation. These examples indicate how the integration of the information system leads to the evolution of the function of logistics from merely a transaction-based process to an intelligence-based activity, whereby information adds value to activities such as transportation of goods.

Characteristics of an information-driven logistics ecosystem

★ **Flows of secure data:** Information across stakeholders in logistics and supply chains becomes available with a significant decrease in the time needed to coordinate.

★ **Visibility:** Real-time access to data helps make decisions as quickly as possible.

★ **Interconnected digital applications:** With standardised data exchange, the duplication of efforts and resources is eliminated, and logistics operations are streamlined.

★ **Advanced operational data:** Advanced data analytics and operational intelligence/data are easily converted to actionable insights and competitive advantages within logistics operations.

★ **Logistics ecosystems:** Information is combined to optimise public and private logistics operations and services.

★ **Data science in formulating logistics policies:** Better logistics data and analytics help in making better informed decisions and associated reforms within the logistics sector, including logistics infrastructure improvement.

Industry perspective

Leading global economies rely on logistics systems built on digital platforms connecting supply chain information. India has focused on digital public infrastructure to facilitate a modern context of the logistics system. Users of logistics services are able to derive as much value from logistics data as they do from physical logistics infrastructure. The ability to convert disjointed supply chain information to interconnected supply chain intelligence alters how supply chains can be tracked, optimised and managed.

Looking ahead

The potential of logistics technologies to cultivate intelligent systems, improve forecasting and enhance efficiency will be as good as the data powering them. India will strengthen its global trade and manufacturing status, making advanced logistics systems with focus on data as a prerequisite for competitiveness and margin improvement. The organisations that succeed in the next decade will not be the largest with the biggest logistics infrastructure, but the fastest to contextualise, decide and act upon information to the greatest positive effect.

Conclusion

India's info logistics combines infrastructure and information. Digital networks and real-time visibility are the building blocks of smart and safe supply chains, and will give India the edge it needs to compete globally. In the information economy, the trade of goods will depend on the trade of data.

The organisations that succeed in the next decade will not be the largest with the biggest logistics infrastructure, but the fastest to contextualise, decide and act upon information to the greatest positive effect

VESSELS In Port & DUE AT JN PORT (NSFT/NSICT/NSIGT/BMCT/GTI) FOR EXPORT

PIL launches Imara Express (IMX) service to boost India-East Africa connectivity

Exim News Service

SINGAPORE, Aug. 6

PACIFIC International Lines (PIL) is reinforcing its presence in Africa with the launch of its Imara Express (IMX) service, a dedicated weekly connection between India and East Africa. Complementing PIL’s existing Asia-Africa network, IMX expands connectivity and provides customers with greater access to key growth markets across the region.

The new service connects major production hubs and consumer markets across India and East Africa, responding to growing trade demand between the two regions. Offering direct weekly sailings, competitive transit times and reliable schedules, IMX helps customers capture new trade opportunities, move cargo more efficiently while enhancing supply chain resilience.

Named after the Swahili word “Imara”, which means strong, dependable and resilient, the service reflects PIL’s commitment to putting customers first by providing reliable and efficient shipping solutions for their evolving logistics needs, the company emphasised in a communique.

The first sailing of the IMX service will commence from Nhava Sheva on September 23, 2026.

Mr William Ho, General Manager, Long-Haul Services, PIL, said, “PIL has been serving the Asia-Africa trade for decades, building deep market

expertise, strong partnerships and a trusted network across the continent. The launch of Imara Express extends our existing Asia-Africa network and supports the growing trade flows between India and East Africa. Together with our existing services, IMX provides customers with a more comprehensive network package, expanding market access with greater flexibility, and more options to optimise their supply chain needs in an increasingly dynamic trading environment”.

The ports of call for the Imara Express are:

Nhava Sheva/Mundra/Dar Es Salam/Mombasa/ Nhava Sheva
